

SU = Start-Up (time before first hit-box comes out) / TF = Total Frames (time before Madeline can act again)

Madeline – Celeste

Characteristics:

- Wall jump
- Wall cling: climb up and down, 1 jump
- Mediocre ground movement (Peach)
- Good air movement (MGW)
- Below average jump height and double jump height (Link)
- Above average gravity (MGW)
- Light weight (Ness)
- Bad airdodge: SU 4, TF 70, low reach

Moves:

Grounded Normals:

Jab (SU 3, TF 37, 7%):

- 3-hit combo using hands and feet
- Fast close quarter move
- Quite safe on shield
- Quite stubby

Forward-Tilt: Barrier (SU 9, TF 36, 10%):

- Spawns a translucent wall in front of Madeline
- Multi-hit, safe on shield but doesn't do much
- Blocks projectiles and attacks that deal less than 13% damage

Down-Tilt: Spring (SU 11, TF 23):

- Places a spring on the ground in front of Madeline that disappears after 1 second and launches anyone that steps on it in the air
- Has low vertical set knockback but doesn't deal damage, making it a very reliable combo starter at any percent
- Doesn't deal hitstun to Madeline and launches her a bit higher than her normal jump
- Has big shield push-back and shield stun, making it very safe
- Can be placed on platforms created by Madeline

Up-Tilt: Bonus Points (SU 8, TF 39, 12%)

- Madeline Spawns a Strawberry in front of her, dealing 3% and launching the victim in the next part of the move by grabbing it, at which point the message «1000 points» appears above her head, carrying the opponent upwards and launching him
- Has low base knockback and knockback growth, making it a good combo move at low percent but not great later on
- Great disjointed anti-air, hits on platforms
- Very unsafe

Dash-attack: Red Bubble (SU 15, TF 82, 11%)

- Madeline enters a Red Bubble while dashing forwards very far but at quite a slow speed
- The move is cancelable at any time with a dash but can't be stopped otherwise and goes past ledge
- Crosses-up shields reliably
- Bounces when colliding a Shimmer Block, goes through Space Blocks

Smash attacks:

Forward-Smash: B-SIDE! (SU 20, TF 60, 19%):

- Madeline swings a huge cassette in front of her, dealing massive damage and knockback
- Good disjoint, not very safe

Down-Smash: No More Landing (SU 16, TF 45, 14%, 5%)

- Spawns spikes on both sides of Madeline, even on Space Blocks or Falling Platforms she created
- Sends diagonally
- As you charge, the spikes cover more and more ground
- When the move is done, spikes stay on the ground for 6 seconds as a lingering hitbox, lightly damaging Madeline and her opponent if they ever touch it

Up-Smash: Coin Trap (SU 7, TF 47, 13%):

- Spawns a blue Shield Token above Madeline, offering a disjointed hitbox
- Upon contact with an opponent, the coin turns white, dealing a small amount of damage, and then magenta
- When this happens, a big block crested with the same symbol and color comes out the floor and launches the opponent

- Okay kill move, great out of shield option and combo ender

Aerial moves:

Neutral-Air: Bumper (SU 9, TF 34, 8%):

- Madeline covers herself with a blue Bumper, covering her whole body
- Upon contact with an opponent, the Bumper triggers and sends them in whatever direction they hit the Bumper at
- Deals high set knockback, making it a reliable «get off me» tool and edgeguard (can spike although not very forcefully)

Forward-Air: Sludge Attack (SU 6, TF 37, 8%):

- Madeline reaches out her hand and spawns Sludge enemies, creating a disjointed multi-hit similar to Ness' Forward-Air
- Good combo move and spacing tool
- Reliable, barebone attack
- Creates a hitbox on opposite side of Space Blocks when used next to one

Back-Air: Pufferfish (SU 15, TF 58, 15%):

- Madeline holds out a Pufferfish behind her
- Upon contact with an opponent, the fish explodes, sending the opponent flying at a harsh horizontal angle
- Very unsafe and commital, but very good kill move
- You can hit the Pufferfish, deflecting the attack and turning Madeline into a sitting duck

Down-Air: From the Sky (SU 18, TF 44, 13%):

- Madeline spawns a Falling Platform
- «Stall-and-fall» move, sends horizontally with mediocre knockback
- Madeline can jump off of the block like Steve's Anvil, leaving it fall alone
- Once it hits the ground, it disappears after 3 seconds
- Same size as Shimmer Block
- Good shield-breaker
- Bounces on Shimmer Blocks for 3 seconds, or 2 times before disappearing
- Falling Platforms linger on Disappearing Platforms, decaying them normally and continuing their descent afterwards
- Falling Platforms slow down when going through Space Blocks, taking 2 full seconds to come out entirely

Up-Air: Jellyfish (SU 12, TF 60, 10%, 3%)

- Madeline holds a Jellyfish above her head, which kills with good horizontal coverage, but doesn't combo
- She then enters a quick glide that lasts 1 second, holding the sour spot parachute above her
- This glide is cancellable at any time and can be directed freely
- The glide can only be used once per airtime

Specials:

Neutral-B: Dash (SU 12, TF 20):

- Fast burst movement option
- Interacts with other moves in plenty of ways
- Once per airtime, no freefall
- Disponibility indicated by hair
- Combo extender, recovery move, alone or with combinations
- Snappy and responsive
- Versatile move, most used
- When out of Dashes, the move spawns a Dash Crystal at Madeline's position, which resets her dash upon touching it again; the crystal is only usable after 2 full seconds and disappears after 8
- If you jump during the grounded dash, you perform a Super, which gives Madeline very high momentum but consumes the dash and her double jump

Side-B: Projectiles:

- Spawns one of three types of projectiles
- If the special button is tapped, spawns Badeline's Flurry (SU 24, TF 47, 3x6%)
- Badeline, Madeline's twisted doppelganger, launches 3 red orbs of energy in quick succession that launch enemies at a generous horizontal angle, with low base knockback and knockback growth
- The projectiles are all directed at the position of the enemy when the move was first used, like Palutena's Autoreticle
- The projectiles only disappear upon hitting an opponent or a blast zone, not a solid surface
- The 3 orbs don't particularly combo well into one another
- Situational edgeguard or closing gap tool
- If the special button is held, spawns Badeline's Fury (SU 56, TF 115, 26%):

- Badeline and Madeline charge both red and blue energy that merge to create a huge laser projectile similar to Robin's Thoron, although is a single hit
- Travels straight and through solid surfaces and characters alike
- Kills very reliably off the side but takes a long time to set up
- Good edgeguard
- If the special button is smash-inputted, spawns the Dash Blades (SU 45, TF 60, 7%)
 - Lingering hitbox placed at a distance on the left or right of Madeline, disappears after 12 seconds
 - Damages anyone, even Madeline herself
 - If Madeline Dashes while Dash Blades is out, the block will move in the same direction as the dash, a bit further, dealing knockback based on the position of the victim (left or right) and adding a flat 4% to the move's damage
 - Once the move's done travelling, it comes back to its place slowly and disappears after 1 second
 - The Dash Blades cannot be placed off stage whatsoever : they will snap to ledge

Down-B: Surfaces (SU 3, TF 75):

- Spawns one of three types of platform which despawns naturally after 10 seconds
- Only one type of platform can be spawned at once
- When the move is used while a block is already out, comes back to Madeline with matching particles; only then can she place another; this action takes 25 frames
- When placing a block, you can choose the direction in which it will be placed, at a longer distance from Madeline if placed on the left or right
- You can only place a block once while airborne
- Can't be placed if another character is in the way
- Will stop against solid surfaces
- Cannot be placed to block the ledge
- If the special button is tapped, spawns a Shimmer Block:
 - Square shaped block that bounces characters and projectiles back
 - Can cover Madeline's body fully, not too big
 - If Madeline dashes into it, the bounce is way stronger, sending Madeline flying without giving her her dash back
 - Doing this consumes the block
- If the special button is held, spawns a Space Block:
 - Madeline can dash through, exiting the other side with high velocity and a strong, high knockback hitbox attached to her whole body, launching upwards; this attacks consumes the block

- This dash deals 18%, has high base knockback and knockback growth, putting Madeline in freefall
- Great combo ender if set up properly, good enough burst movement option
- The block is a bit bigger than the Shimmer Block
- Anyone can stand on the block, but it doesn't recharge Madeline's dash
- Projectiles go right through the block
- If the special button is smash-inputted, spawns a Disappearing Platform:
- Acts like normal ground, gives Madeline her dash back
- Disappears 1 second after someone/something lands on it

Up-B: To the Summit (SU 3):

- The player is given a choice between 3 recovery options, and can only use one of them once while airborne; resets after being hit:
- If the special button is tapped, Madeline uses the Purple Orb (TF 45):
- Badeline comes out and launches Madeline upwards at a fair distance (Bowser Jr.'s Up-B), leaving her plummeting into freefall
- The move is invincible starting from frame 8 and during the entire rise, making it a safe and reliable recovery move
- If the special button is held, Madeline uses The Feather (TF 110):
- Madeline transforms into a ball of light capable of moving in any direction for a second and a half, after which she is put into freefall
- This doesn't grant any invincibility or coverage, but allows her to recover from virtually anywhere in an unpredictable manner
- If the special button is smash inputted, Madeline uses the Green Bubble (TF 30, 9%)
- Short burst in any direction with a hitbox surrounding Madeline
- Doesn't put into freefall and doesn't consume the dash
- It has very low knockback, at a particularly good angle to be a combo starter and extender, although a very stubby one at that

Grabs and Throws:

- Grab: SU 7, TF 35
- Dash-Grab: SU 9, TF 40: Tries to catch a Strawberry but misses

- Forward-Throw: Bird (12%)

- Madeline holds her opponent in the air, as a Bird stoops and rams into them, launching them forward

- Not a combo starter and not a kill move, just sends offstage with good damage

- Back-Throw: Kevin (11%)

- Madeline spawns a Kevin block in front of her before dashing into it; the block then comes back, hitting the opponent

- Good kill throw but bad at low percent

- Down-Throw: Traps! (8%):

- Sludge-Spawning Tiles are placed under the opponent, which Madeline lets go off, letting them fall into the trap as she grins

- This is a combo throw, not a very good one

- Up-Throw: Badeline launch (10%):

- Badeline spawns, carrying the opponent up for a bit, before launching them upwards

- Doesn't kill without platforms, doesn't combo
